

SUREHOLD®

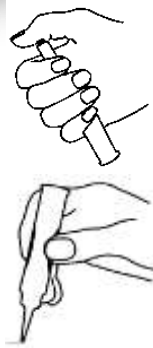

Adhesives for every application

Plastic Surgery® Super Glue

Specifically formulated to bond plastics more securely than other instant glues or gels.

- Most glue rejects foreign materials; this glue is specifically engineered to "bite" into plastic materials. Bonds more of today's engineered plastics, such as:
 - Acrylic, ABS, EPDM, Nylon, Fiberglass, Phenolic, Plexiglas, Polycarbonate, Polyester, Polystyrene, PVC and Urethane
- Drip-Proof, Clog-Proof Patented Applicator
 - Stores longer than most glues . . . tube won't clog up after repeated use; use again and again
 - Push the Yellow Button on tube cap to puncture seal, twist off cap and apply glue
 - Precise and controlled distribution of the glue (drop by drop)
 - Minimal clean up; glue is drawn back into the tube once pressure is released
 - A minimum of 12 months shelf life once the product has been opened and used
- Bonds in seconds
- Not just for plastics, bonds most surfaces
