1.6A RMS Up to 400 Volts

C5 Series
2N2322-29
2N2322A-28A

The C5 Series of Silicon Controlled Rectifiers are reverse blocking thyristors for use in low power switching and control applications. They feature two ranges of gate sensitivity and high external gate-cathode shunting resistance.

- All-diffused
- Two ranges of gate sensitivity—2N2322-29—200 $\mu$ A max. & 2N2322A-28A—20 $\mu$ A max.
- Low holding current
- Broad voltage range
